02.73 / 11.74	TOTAL C.F.P. PARIS	Drilling Engineer, Ultra Deep sea (10,000ft) drilling and development studies.

### Main recent occupation

All Companies keep experiencing very serious accidents that leave everyone shaken.

The analyses undertaken should enable us to determine the causes of each accident and learn and share the necessary lessons, as appropriate.

While the specific findings may differ for each accident, they all occurred after safety performance had improved significantly across all of our businesses.

International energy Companies have been regularly comparing methods, standards and results for a number of years to continuously improve the safety of their operations. Thanks to this collaborative approach, as well as external audits conducted in accordance with internationally recognized protocols, best practices could be identified and shared across the industry.

Even though the circumstances surrounding each of the accidents were very different, their severity and the fact that they occurred over a relatively short period of time necessitated a detailed reexamination of the effectiveness of safety procedures and standards in the Industry. That is why TOTAL's CEO decided in 2009 to set up an HSE Inspection Task Force.

Then twenty people contributing expertise in various fields (including safety, operations, inspection, maintenance, processes and human resources) and representing all of TOTAL's businesses (Upstream, Downstream and Chemicals) were temporarily released from their regular jobs to carry out this important assignment.

The main assignment of the Task Force was to understand why situations with a high-risk potential were still arising and why there still were significant discrepancies between requirements and actual practices.

I was one of the leaders of this Task Force which was also in charge of the control loop of the recommendations issued by this HSE Inspection Task Force towards the numerous industrial sites of TOTAL disseminated around the world, and I was authorized by TOTAL to use the same method for providing other companies with the same type of expertise through retired, but still very active and experienced people coming from various industrial origins.

I also had the duty to train through specific seminars middle and top managers of TOTAL, all branches included (E&P, Refining, Petrochemicals, Specialties, Marketing and Services, New Energies), and raise their awareness of an increasing Health, Safety, Security, Environment and Sustainable Development preeminent importance.

## Biography

I presently deliver Business Development, Operations Management and HSE awareness training to Universities (Abu Dhabi, Cyprus, Bulgaria, Poland, Congo, Brazil, Algeria...) and Governmental Bodies (Tajikistan, Abu Dhabi Petroleum Institute, Congo...) under Total Professeurs Associés hat ([www.totalprof.com](http://www.totalprof.com)), which is an Association linked to TOTAL and which regroups several hundreds of experts, either retired or still active in TOTAL Group. Their field of experience encompasses all aspects of Oil, Gas and related activities business.

Besides this activity, I have started another activity in Singapore in May 2014, to support several contractors of various TOTAL subsidiaries for implementing or improving their Safety Management System.

I am a member of the Supervisory Board as a Management and HSSE expert of the PESCHAUD Company ([www.peschaud-international.com](http://www.peschaud-international.com)). PESCHAUD is a Company operating modern and versatile vessels, offshore services platforms and drilling rig move equipment. PESCHAUD is currently developing strongly and can satisfy its customers all over the world.

I am also General Delegate for Africa Area of EVOLEN ([www.evolen.org](http://www.evolen.org)), ex-GEP-AFTP (Groupement des Entreprises Pétrolières et Parapétrolières – Association Française des Techniciens du Pétrole), which is the French Association of 250 Companies and 1100 professionals and experts in the Oil, Gas, Renewable Energies and related Industries. The main objective of this Association is to promote business relationship and development between French and foreign Companies, so as to conclude win-win partnerships and allow Companies involved in related activities to satisfy the local content requirements, and get adequate support from local Contractors.

I am also co-President of TECHDRILL International ([www.techdrill.com](http://www.techdrill.com)). TECHDRILL provides Oil Operators and Service Companies in more than 50 countries on all continents with comprehensive engineering software that allows planning, quantification and management of a drilling campaign. TECHDRILL has also set up a training center for drilling techniques in Mexico. Its offices are located in London, Houston and Lisbon.

Finally, I am President of ACP Energies ([www.acp-france.org](http://www.acp-france.org)), an organization founded more than 30 years ago bringing together more than 12000 experts covering all areas of the hydrocarbon industry, as well as all renewable energy sectors.

### Honours

Chevalier de l'Ordre du Mérite Français

Officier de l'Ordre du Mérite Congolais

*I, the undersigned, certify that to the best of my knowledge and belief, this resume correctly describes myself, my qualifications, and my experience.*

Louis Heuzé
